

# Trevor Elliott

---

---

## Experience

- 2019–Present **Infrastructure Engineer**, *Stripe*, Portland, OR.  
Working on the sorbet typechecker for ruby.
- 2017–2019 **Compiler Engineer**, *Groq, Inc.*, Portland, OR.  
Worked on a compiler for tensorflow models, targeting a custom ASIC that accelerates inference. Focusing on compiler performance and optimization of results.
- 2007–2017 **Engineer and Researcher**, *Galois, Inc.*, Portland, OR.  
Contributed to a broad range of projects, notably:
- Developed domain specific languages in Haskell, including the msf-haskell metasploit DSL and the Ivory DSL for memory-safe embedded programming
  - Developed and contributed to multiple full language implementations, including Cryptol and the Salty GR(1) reactive synthesis DSL
  - Implemented the HaNS network stack
  - Aided ASIC design and verification for lightweight cryptographic primitives from Cryptol specifications
- 2004–2007 **Developer**, *CollegeNET*, Portland, OR.  
Helped to transition a large desktop application to a suite of web services, and developed tools based off of those web services. Also assisted with some front-end web development, and implemented an LDAP-based authentication system.
- 2002–2004 **Technical Support**, *CollegeNET*, Portland, OR.  
Provided technical support to a large client base.

---

## Education

- 2008 **B.S. Computer Science**, *Portland State University*, Portland, OR.

---

## Open Source Projects

- cereal Haskell library for fast binary format parsing/rendering
- ivory Haskell EDSL for memory-safe embedded programming
- salty Reactive synthesis DSL for GR(1) specifications
- msf-haskell Haskell EDSL for interacting with the metasploit framework
- HaNS A TCP/IP network stack implemented in haskell
- Cryptol DSL for implementation and verification of cryptographic algorithms
- HaLVM Port of the GHC runtime to the Xen hypervisor
- llvm-pretty An EDSL for generating textual llvm bitcode
- huff A fast-forward based classical planning EDSL
- pretty Contributed support for document annotations

---

## Skills

- Languages haskell, rust, c/c++, java, javascript, fsharp, ocaml, python, ruby, assembly (x86, arm), coq, isabelle/hol, shell scripting
- Tools z3, smt-lib, gdb, gnu make, apache ant, vim/neovim

---

## Publications

Trevor Elliott, Lee Pike, Simon Winwood, Pat Hickey, James Bielman, Jamey Sharp, Eric Seidel, and John Launchbury. Guilt free ivory. In *ACM SIGPLAN Notices*, volume 50, pages 189–200. ACM, 2015.

Patrick C Hickey, Lee Pike, Trevor Elliott, James Bielman, and John Launchbury. Building embedded systems with embedded dsls. In *ACM SIGPLAN Notices*, volume 49, pages 3–9. ACM, 2014.

John Launchbury and Trevor Elliott. Concurrent orchestration in haskell. In *ACM Sigplan Notices*, volume 45, pages 79–90. ACM, 2010.

Dylan McNamee and Trevor Elliott. Secure historian access in scada systems. *Galios, White Paper*, 2011.

Lee Pike, Pat Hickey, Trevor Elliott, Eric Mertens, and Aaron Tomb. Trackos: A security-aware real-time operating system. In *International Conference on Runtime Verification*, pages 302–317. Springer, Cham, 2016.

Lee Pike, Patrick Hickey, James Bielman, Trevor Elliott, Thomas DuBuisson, and John Launchbury. Programming languages for high-assurance autonomous vehicles. In *Proceedings of the ACM SIGPLAN 2014 Workshop on Programming Languages meets Program Verification*, pages 1–2. ACM, 2014.

Tristan Ravitch, E Rogan Creswick, Aaron Tomb, Adam Foltzer, Trevor Elliott, and Ledah Casburn. Multi-app security analysis with fuse: Statically detecting android app collusion. In *Proceedings of the 4th Program Protection and Reverse Engineering Workshop*, page 4. ACM, 2014.
